The Steps to Success

Before beginning your first project it's important to learn the basics of fauxchet® stitching.

- 1. Learn to thread and hold the easyloop® tool.
- 2. Practice the easy PUSH/PULL motion of stitching.
- 3. Learn to make the chain stitch and practice making consistent sized stitches in your chain.
- 4. Make a practice square of the fauxchet® stitches.

You can combine fauxchet® with traditional knitting and crochet.

- 1. Choose the technique or pattern you want to use.
- 2. Choose a yarn.
- 3. Learn the fauxchet® stitches used in the technique or pattern you'll be using by creating a practice square of each.
- **4.** Begin the pattern and refer to the stitches and techniques sections to guide you along as you stitch.

What You Will Need

1. easyloop® fauxchet® Tool 2. Yarn

3. Tape Measure 4. Scissors

Yarns That Work

Worsted Weight

Bulky Weight

Tips and Tricks

Worsted and bulky weight yarns work nicely with the tool. Remember to test the yarn first to be sure it will slide easily through the needle eye before purchasing it for your project. It's easy to adjust your gauge and the size of the stitch you are making. This is determined by how far you push the tool into the stitch and how far you pull back the tool out of the stitch.

Always pull the yarn from the center of the skein and keep plenty of slack yarn coming out of the skein while stitching. Tension on the yarn coming out of the skein makes stitching difficult.

Always work on your lap for the best stability in keeping your stitching stable. Keep your stitches loose (not tight) and your projects will turn out great. Yarn is forgiving and your stitching will flow much easier and faster if stitches are kept loose while stitching.

Be careful to not twist the chain. Always keep the needle inserted into the last stitch you made when setting your work down. Count your stitches as you work to prevent missing any stitches. There should always be an extra turning stitch at the end of each row.

If you have too much slack yarn between the last stitch you made and the needle tip, simply adjust the amount of slack yarn so there is only one inch between your last stitch and the needle tip.

Control your tension on the yarn by running the yarn between your index finger and middle finger. When grasping the yarn at the left of the needle eye, if the needle does not pull back easily, the needle has become twisted and the yarn is at the wrong side of the needle eye.

Let both hands work equally together. While your right hand is manipulating the needle, your left hand is manipulating the loops of yarn (or vice versa). Have your left hand ready and in position for what the right hand is about to do.

Threading the Tool

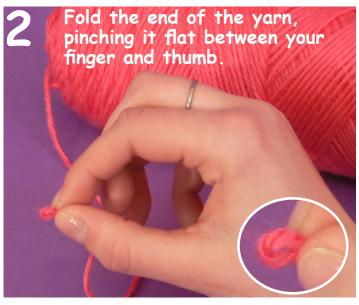

THREADING THE TOOL

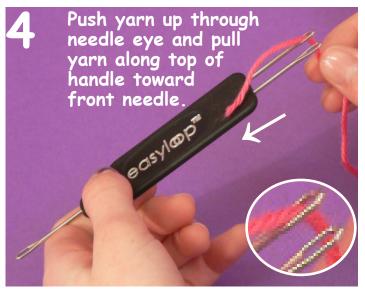

The tool is threaded by pushing the yarn up through the right rear needle eye, across the top of the handle and down through the front needle eye.

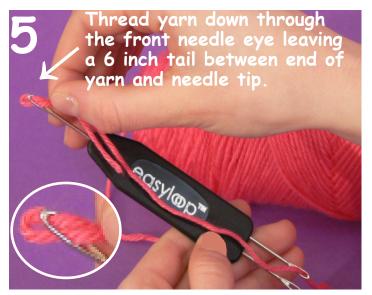

When stitching with a double strand of yarn, try to treat the two strands as one strand, by holding them together tightly as if they were one bulky strand.

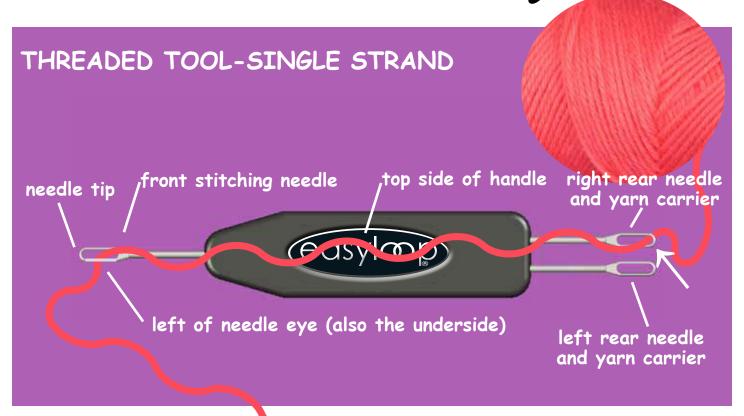

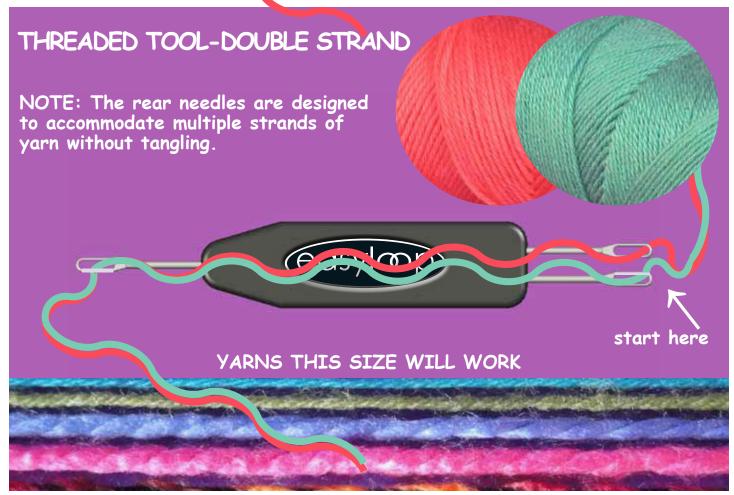

Threading the Tool

Threading the Tool with Bulky Yarn

The photos here show threading the tool with bulky yarn with the help of floss threaders.

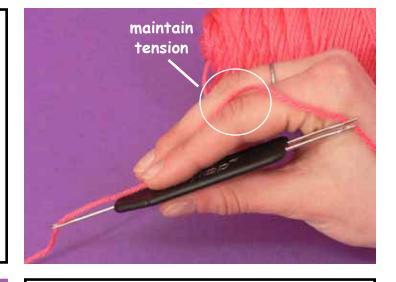

Holding the Tool

HOLDING THE TOOL

Hold the tool like a pencil, with your thumb holding the underside of the handle and your index finger on the top side of the handle.

MAINTAINING TENSION

Maintain slight tension on the yarn running to the needle eye with index and middle finger.

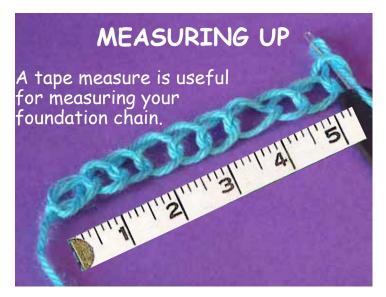

Each stitch has a front loop and a back loop (needle is inserted through one or both loops) depending on the stitch (the front loop is the one closest to you while working). BACK LOOP FRONT LOOP

UNDERSTANDING THE LOOPS

When you work a basic stitch, usually the stitches are worked into both the front and back loops of the stitch.

For a variation, you can work a stitch into either the front or back loop only. This produces a different effect because the loops on the previous row make a ridge on the fabric.

Useful Information

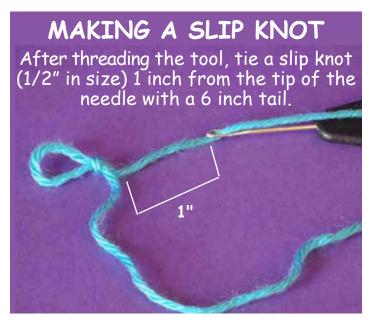

ADDING NEW YARN

When stitching stripes or when you need to add more yarn, cut yarn where desired and unthread needle.

Rethread needle with new yarn and push tool into the last stitch you made.

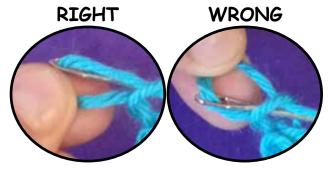

Tie new yarn to previous yarn end with a double knot and continue stitching.

KEEPING SLACK YARN Pull yarn from the center of the skein and keep plenty of loose yarn pulled out while working.

MAKING A CHAIN Once you master making a chain you have learned the basics of how the tool works.

IMPORTANT TIP When grasping the yarn at the left of the needle eye (the underside) if needle does not pull back easily, needle has become twisted and yarn is at the wrong side of the needle eye.

Controlling Fauxchet® Tension and Gauge

It's important to understand how to control your tension with the fauxchet® tool.

The tension controls the size of the stitch you are making and is controlled by how far you push the needle into the loops and how far you pull back the needle out of the loops while stitching.

Unless indicated otherwise in the pattern you are using, there is a recommended tension for most stitches when working from an easyloop® fauxchet® pattern.

TENSION FOR WORSTED WEIGHT YARN:

Pull needle back 1 INCH and push needle through loop 1 INCH (1 INCH is TWO THIRDS OF THE WAY to the handle).

TENSION FOR BULKY WEIGHT YARN:

Pull needle back 1 1/2 INCHES and push needle through loop

1 1/2 INCHES (1 1/2 INCHES is ALL THE WAY to the handle).

TENSION FOR DOUBLE STRAND WORSTED YARN:

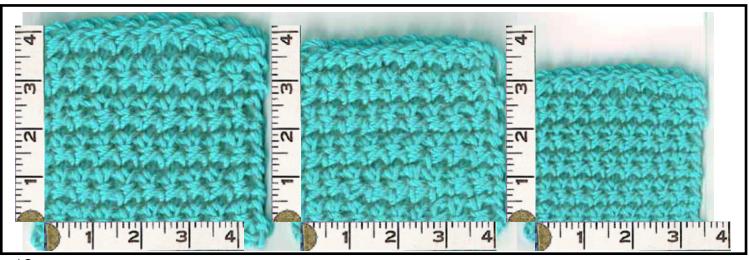

Pull needle back 1 1/2 INCHES and push needle through loop

1 1/2 INCHES (1 1/2 INCHES is ALL THE WAY to the handle).

MAKING A GAUGE SWATCH:

Work several inches of at least 2 pattern repeats (or a 4 inch x 4 inch swatch). Measure how many stitches and rows you have made in a 4 inch area (in the center of the swatch). If your measurements are smaller than required, make another swatch using a larger tension setting (pushing needle farther into the loop and pulling needle back farther out of the loop).

If your measurements are larger than required, make another swatch using a smaller tension setting (pushing the needle into the loop a shorter length and pulling needle back a shorter length).

OPTIONAL EXTRA: USING STITCH TENSIONERS TO CONTROL TENSION

Stitch tensioners can be used for reducing the size of your stitch to achieve a smaller size stitch (smaller gauge). Tensioners are easy to make with point protectors.

POINT PROTECTORS are commonly used for knitting needle ends to keep stitches from falling off. They can be purchased at craft and yarn stores, trimmed accordingly and used as stitch tensioners.

Crochet to Fauxchet® Conversion Chart

HOW TO USE THIS CHART: By using the following conversion chart it's easy to use many beginner crochet patterns using the fauxchet® stitching method.

CROCHET STITCH

FAUXCHET® STITCH

CHAIN STITCH

Use the **CHAIN STITCH** (as shown in the easyloop® fauxchet® instruction book) adjusting tension as recommended for the weight of yarn you're using.

Tension for WORSTED WEIGHT YARN: Pull needle back 1 INCH and push needle into loop 1 INCH.

Tension for BULKY YARN: Pull needle back

1 1/2 INCHES and push needle into loop 1 1/2 INCHES.

SLIP STITCH

Use the **SLIP STITCH** (as shown in the easyloop® instruction book) adjusting tension as recommended for the weight of yarn you're using.

Tension for WORSTED WEIGHT YARN: Pull needle back 1 INCH and push needle into loop 1 INCH.

Tension for BULKY YARN: Pull needle back

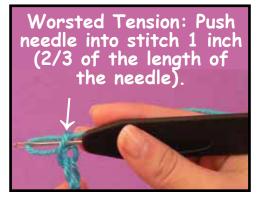

1 1/2 INCHES and push needle into loop 1 1/2 INCHES.

SINGLE CROCHET

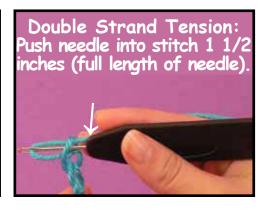

Work SINGLE CROCHET as SINGLE FAUXCHET® (as shown in the easyloop® fauxchet® instruction book) adjusting tension as recommended for the weight of yarn you're using. (SINGLE FAUXCHET® is worked from the WRONG SIDE of the fabric.)

Tension for WORSTED WEIGHT YARN: Pull needle back 1 INCH and push needle into loop 1 INCH.

Tension for BULKY WEIGHT YARN: Pull needle back 1 1/2 INCHES and push needle into loop 1 1/2 INCHES.

CHAIN STITCH

The Chain Stitch is the foundation row of all the other fauxchet® stitches. To begin, after threading needle, tie a 1/2" slip knot 1 inch from the needle tip.

NOTE: The instructions throughout are written for WORSTED WEIGHT YARN and the TENSION should be adjusted if using BULKY WEIGHT YARN.

When making the CHAIN STITCH, always make 1 extra stitch than the pattern calls for (the turning stitch).

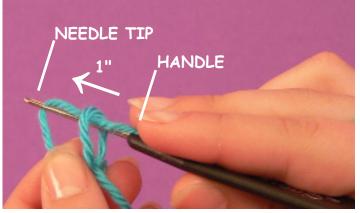

Holding yarn at left of needle eye (aka underside of needle) pull needle out of slip knot 1 inch. This is the first stitch of your basic chain.

Some patterns will begin with a certain number of chain stitches and some will call for a certain length of chain.

Holding slip knot, push needle tip through slip knot all the way to handle (about 1 inch). Do not twist the needle.

Push needle tip through newly formed stitch, pushing stitch all the way to handle, so your chain won't be too tight (as in step 2).

Chain Stitch

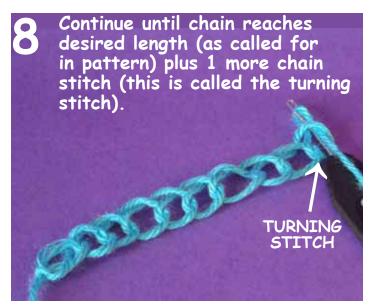

Holding loop, pull needle out of newly formed stitch (pull back 1 inch) as in step 3. This is the second stitch of your basic chain.

IMPORTANT: Be sure to pull the needle back with plenty of SLACK YARN between the loop and the needle eye (approximately 1 inch) so chain won't be too tight.

Pull needle back 1 inch, as in step 5. This is the third stitch of your basic chain (do your best to make the stitches consistent in size).

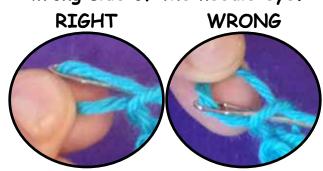

Turn your work so the tool is on your left and the chain is on the right. Be careful to not twist the chain.

IMPORTANT TIP When grasping the yarn at the left of the needle eye (the underside) if needle does not pull back easily, needle has become twisted and yarn is at the wrong side of the needle eye.

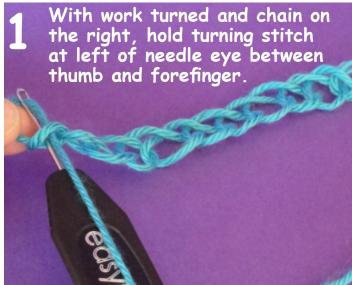

SLIP STITCH

The slip stitch always begins with 1 row of the chain stitch plus 1 turning stitch.

NOTE: The instructions throughout are written for WORSTED WEIGHT YARN and the TENSION should be adjusted if using BULKY WEIGHT YARN.

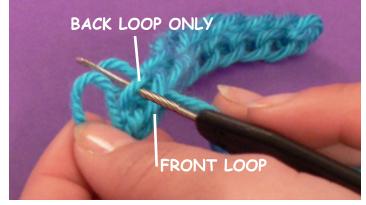

To make a small sample swatch of the SLIP STITCH, begin with a 10 stitch chain (plus 1 turning stitch).

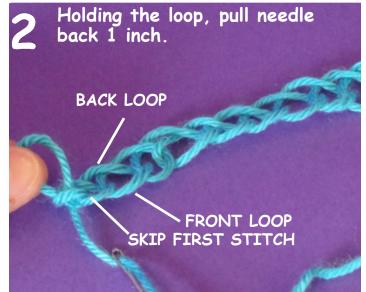

Each stitch has a front loop and a back loop. For the slip stitch the needle is inserted through the back loop only of the stitch.

Slip Stitch

Slide turning stitch on to needle tip, sliding all the way to handle.

TURNING STITCH

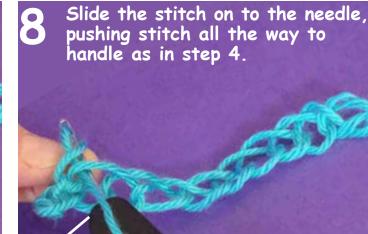

HANDLE

6 Pull needle back 1 inch, forming first slip stitch of row 1.

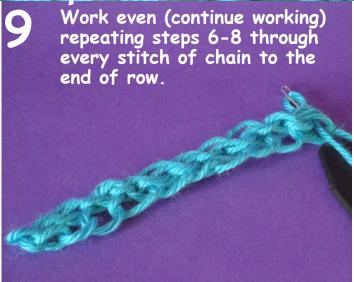

Holding loop, push needle through next stitch of chain as in step 3.

HANDLE

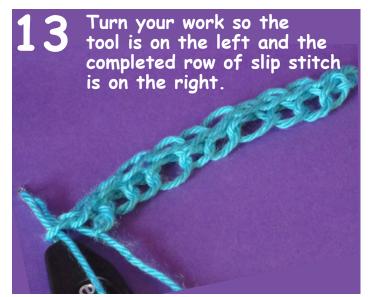

Slip Stitch

Slip Stitch

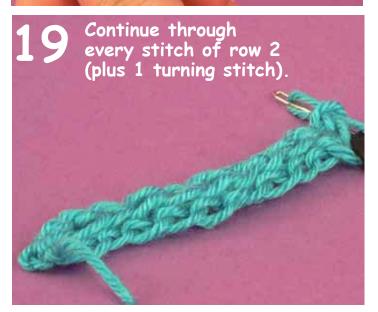

Skipping the first stitch, push needle through back loop only of second stitch of row 1 (as in step 3) pushing stitches all the way to handle.

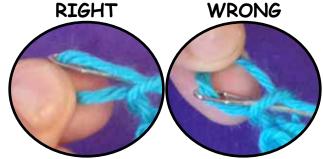

Holding the loop, pull needle back 1 inch, completing the second slip stitch of row 2.

IMPORTANT TIP When grasping the yarn at the left of the needle eye (the underside) if needle does not pull back easily, needle has become twisted and yarn is at the

wrong side of the needle eye.

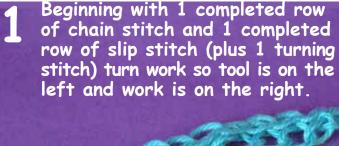

DOUBLE SLIP STITCH

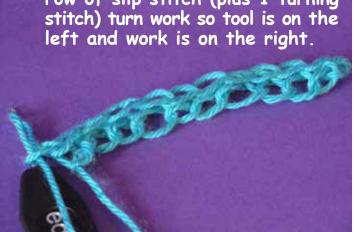

The double slip stitch is a variation of the slip stitch and always begins with 1 row of chain stitch, 1 row of slip stitch (plus 1 turning stitch).

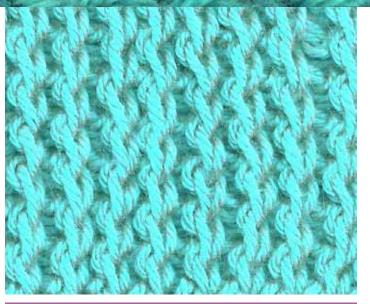

NOTE: The instructions throughout are written for WORSTED WEIGHT YARN and the TENSION should be adjusted if using BULKY WEIGHT YARN.

To make a small sample swatch of the DOUBLE SLIP STITCH chain 10 stitches (plus 1 turning stitch).

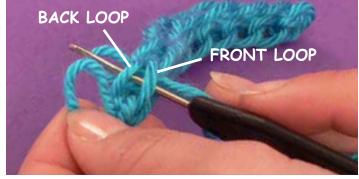

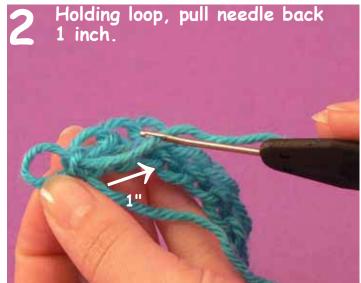

Each stitch has a front loop and a back loop. For the double slip stitch. the needle is inserted through both the front and back loops of the stitch.

Double Slip Stitch

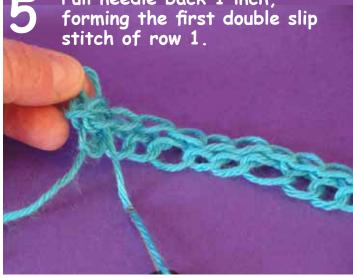

Slide the loop you're holding on to the needle tip, sliding loop all the way to handle.

Pull needle back 1 inch, forming the first double slip stitch of row 1.

Holding the loop, push needle through next stitch of row (front and back loops) as in step 3.

Slide the stitch you're holding on to the needle, pushing the stitch all the way to the handle as in

Work even to end of row (or as indicated in pattern).

Single Fauxchet® Stitch

Visit YouTube for How-to Videos.

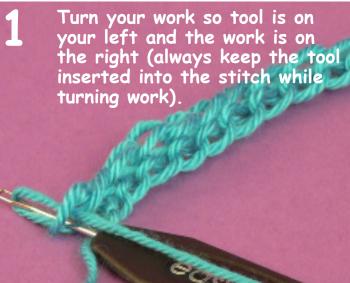

SINGLE FAUXCHET® STITCH

The single fauxchet® stitch always begins with 1 row of chain stitch, 1 row of slip stitch (plus 1 turning stitch).

NOTE: The instructions throughout are written for WORSTED WEIGHT YARN and the TENSION should be adjusted if using BULKY WEIGHT YARN.

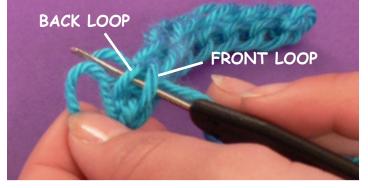

To make a small sample swatch of the SINGLE FAUXCHET® STITCH chain 10 stitches (plus 1 turning stitch).

Each stitch has a front loop and a back loop. For the single fauxchet® stitch the needle is inserted through both the front and back loops of the stitch.

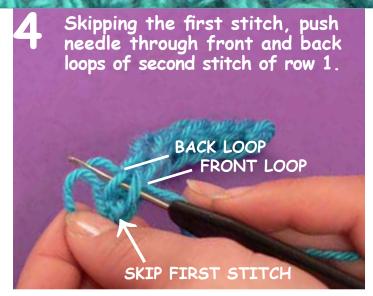

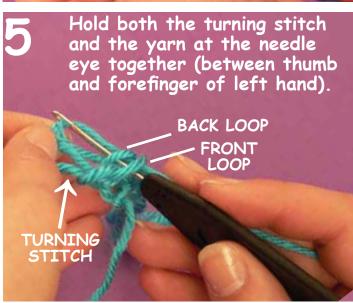

Beginning with 1 row of chain stitch, 1 row of slip stitch and work turned, grasp yarn at left of needle eye.

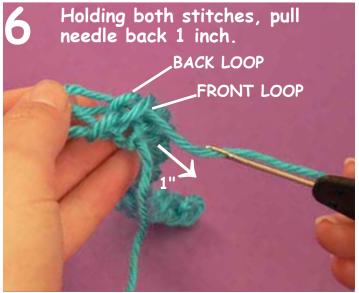

Single Fauxchet Stitch

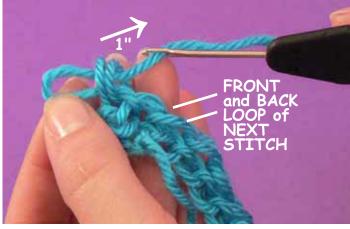

Single Fauxchet® Stitch

Holding yarn, pull needle back 1 inch forming the first single fauxchet® stitch of row 1.

Push needle tip through both the front and back loops of next stitch (third stitch). FRONT and BACK

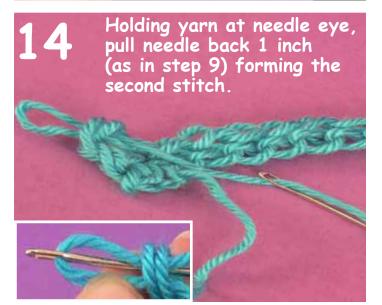

Hold both stitches at needle eye (holding together as if they are one).

Holding both stitches, pull needle back 1 inch (as in 12 step 6).

Push needle through both stitches being held in left hand (as in step 7) hold yarn at needle eye.

Single Fauxchet Stitch

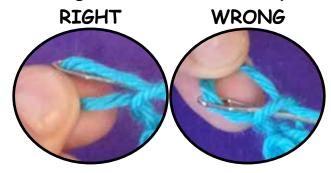

When grasping the yarn at the left of the needle eye (the underside) if needle does not pull back easily, needle

IMPORTANT TIP

has become twisted and yarn is at the wrong side of the needle eye.

Ridged Single Fauxchet Stitch

RIDGED SINGLE FAUXCHET®

The ridged single fauxchet® stitch is a variation of the single fauxchet® stitch and always begins with 1 row of chain stitch, 1 row of slip stitch (plus 1 turning stitch).

NOTE: The instructions are written for WORSTED WEIGHT YARN and the TENSION should be adjusted if using BULKY WEIGHT YARN.

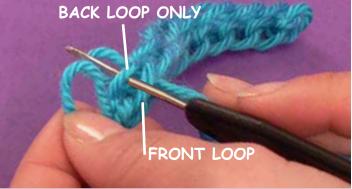

To make a small sample swatch of RIDGED SINGLE FAUXCHET®, chain 10 stitches (plus 1 turning stitch).

Each stitch has a front loop and a back loop. For the ridged single fauxchet® stitch, the needle is inserted through the back loop only of the stitch.

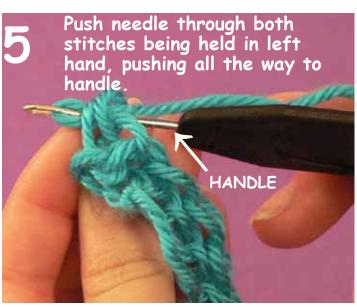

2 Skipping the first stitch, push needle through back loop only of second stitch and work the same as single fauxchet® stitch, except go through back loop only of each stitch.

Ridged Single Fauxchet Stitch

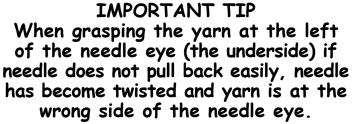

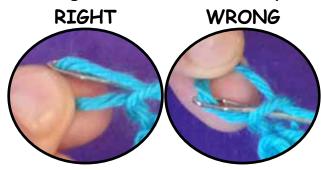

Weaving Yarn Ends In

WEAVING YARN ENDS IN

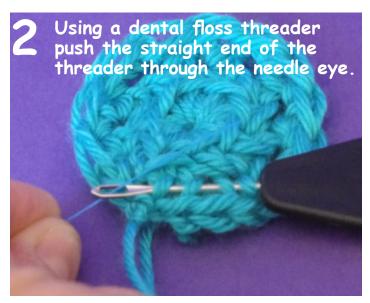

When you are finished with your project, weaving the loose yarn ends in is easy.

It will make your project look even nicer and give it that professional look.

The easyloop® fauxchet® tool is so versatile that weaving the cut yarn ends in to the back side of the fabric is a perfect way to conceal the ends.

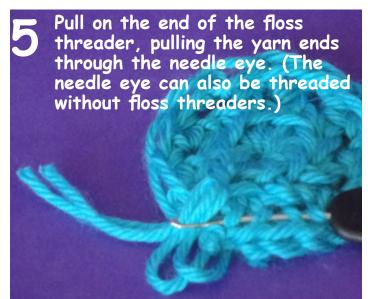

No crochet hook or tapestry needle is required!

Weaving Yarn Ends In

BLOCKING YOUR PROJECTS

There are various ways to block a stitched project depending on the type of yarn, the stitch pattern and the amount of time you have. Unless the yarn label indicates otherwise, most yarns will benefit from a light steaming. Lay a couple of towels on a mattress and lay the project on top. Pin the corners and straighten the edges. Hold an iron about an inch above the stitched surface and let the steam penetrate it. Move the iron slowly above the scarf. Let project dry.

SEAMING

CIRCULAR STITCHING

TOP-STITCHING

Special Techniques

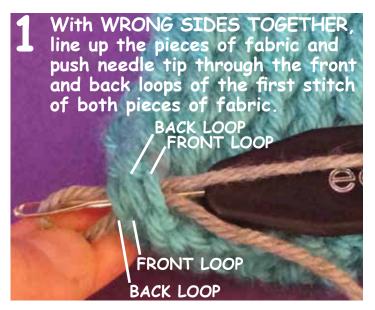

BEADING EDGING LOOP STITCHING

SEAMING

Sewing seams is easy using the easyloop® tool and the SLIP STITCH.

You can use a matching yarn for invisible seams or a contrasting yarn for accent seams.

NOTE: The SAMPLE SEAM is sewn using a piece of double slip stitched fabric with WRONG SIDES TOGETHER.

Seaming

Seaming

Holding loop at needle eye (as in step 8) pull needle back 1 inch forming third stitch of seam.

Seaming

CIRCULAR STITCHING

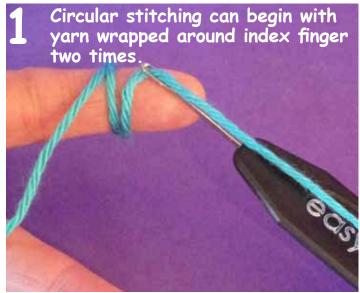

Stitching in circles is used to create a tube or a flat circle.

The pattern will indicate any increases and decreases that should be made, depending on the project.

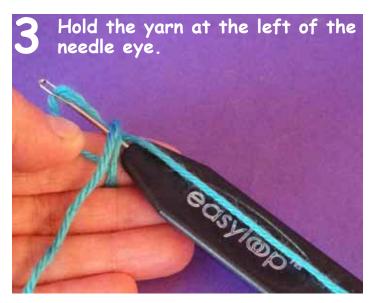

NOTE: The sample swatch shown here is stitched in SINGLE FAUXCHET® STITCH, which is worked from the WRONG SIDE of the fabric, but other stitch patterns can also be used.

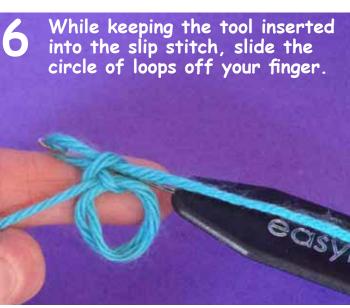

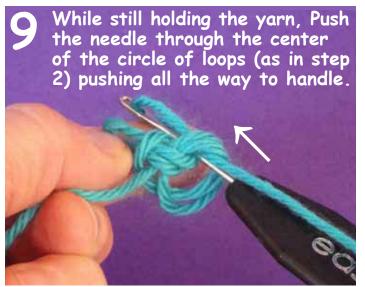

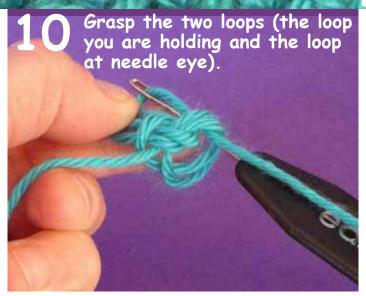

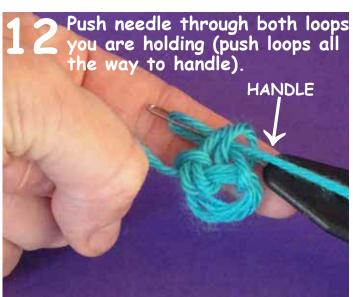

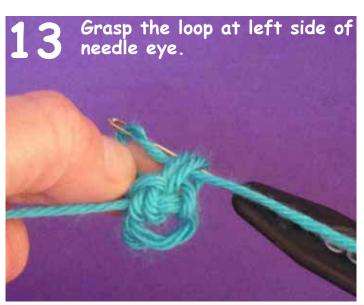

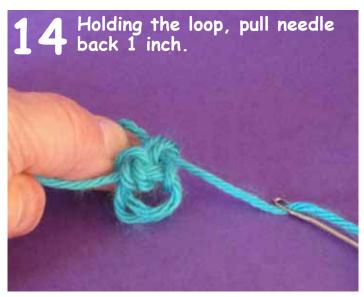

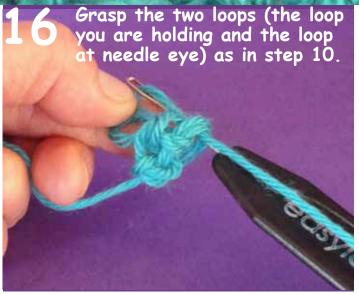

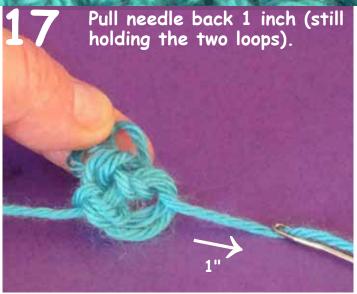

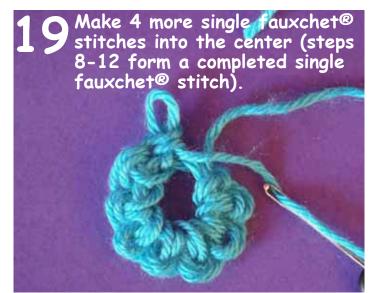

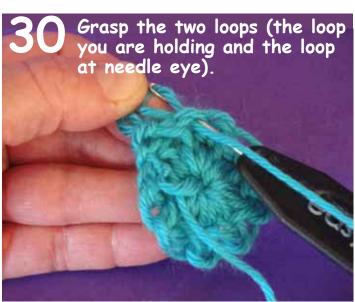

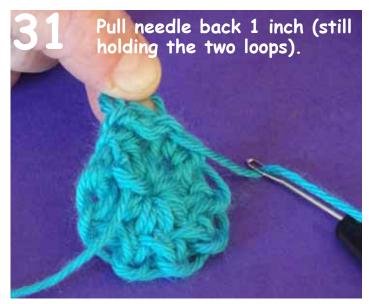

45

TOP-STITCHING

Top-Stitching is easy using the SLIP STITCH!

Stitching on the surface of your projects can be used to create faux plaids, stripes and more!

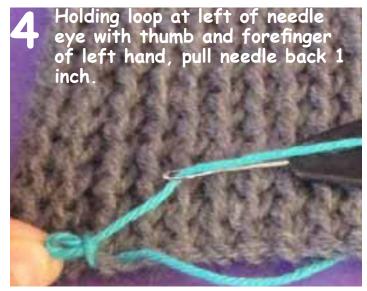

NOTE: The SAMPLE TOP-STITCH here is stitched using a piece of double slip stitched fauxchet® fabric, which provides the perfect ridge to top-stitch along.

Push needle through the back loop only of the next stitch along ridge of fabric and slide the loop you are holding on to the needle.

Holding loop at needle eye (as in step 4) pull needle back 1 inch forming second top-stitch.

Holding loop at needle eye pull needle back 1 inch forming the third top-stitch.

12 Holding newly formed stitch in left hand, push needle through next stitch along ridge of fabric.

SC2XIQDE

14 Hold loop at left of needle eye.

Holding the newly formed stitch in left hand, push needle through next stitch along ridge of fabric.

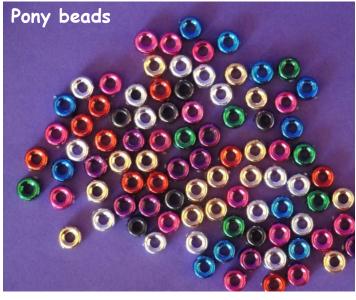

79

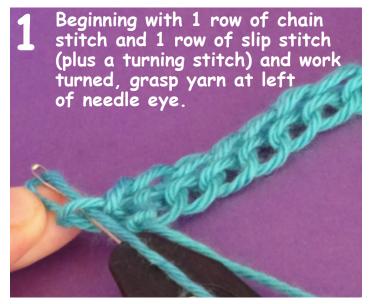

SINGLE FAUXCHET® STITCH WITH BEADS

Pony beads and other large-holed beads fit easily on to the easyloop® needle tip, making it an easy way to add beads while you stitch without pre-stringing the beads on to the yarn!

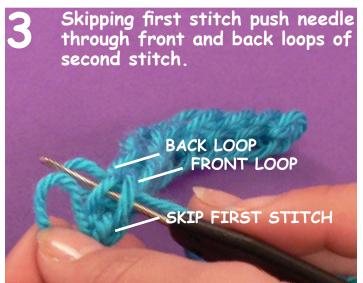

NOTE: Following the steps for the SINGLE FAUXCHET® STITCH, adding beads after making the closing stitch creates a nice beaded fabric.

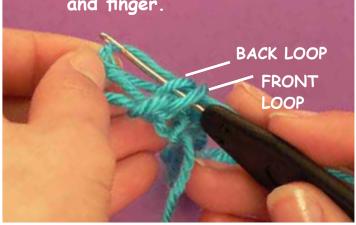

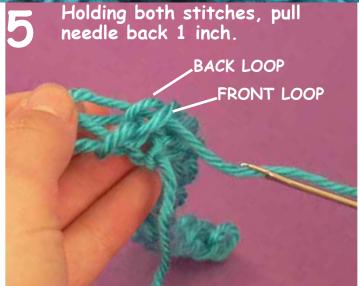

Beading

Hold both the turning stitch and the yarn at the needle eye together between thumb and finger.

Push needle through both stitches (creating a closing stitch).

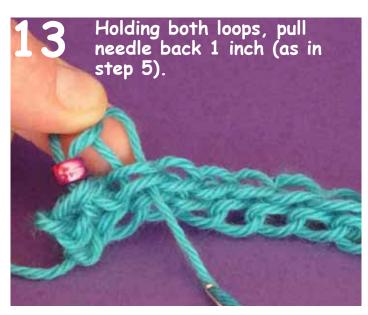

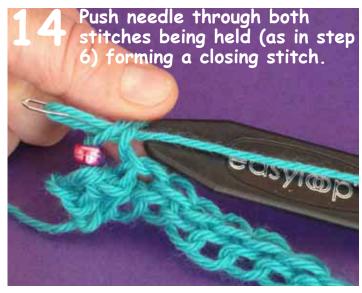

Beading

Holding the loop in left hand push needle through both the front and back loops of next stitch (third stitch).

Beading

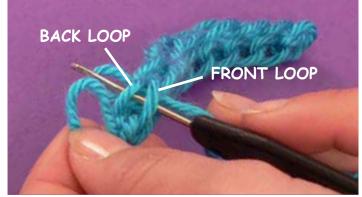

SLIP STITCH EDGING

Working from the wrong side of the fabric, push a threaded tool into the edge stitch of the finished fabric and secure with a slip stitch. Proceed with the slip stitch instructions around the edges as desired.

NOTE: The SLIP STITCH EDGING shown here is stitched around the edges of a piece of single fauxchet® stitched fabric.

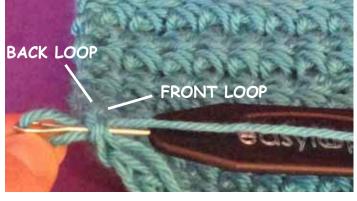

Push the needle through the first stitch at the edge (going through both front and back loops) and hold yarn at left of needle eye.

Push the needle through the loop you are holding (forming a slip stitch) and securing the yarn to the edge.

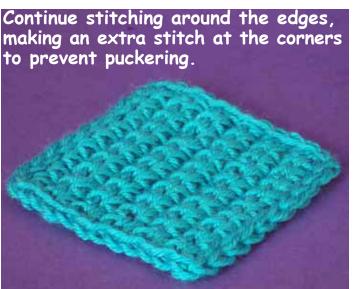

Single Fauxchet® Edging

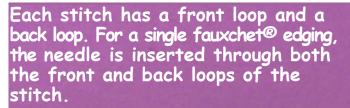

Visit YouTube for How-to Videos.

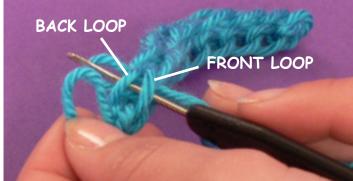

SINGLE FAUXCHET® EDGING

Working from the wrong side of the fabric, push a threaded tool into the edge stitch of the finished fabric and secure with a slip stitch. Following the instructions for single fauxchet®, proceed with the single fauxchet® stitch around the edges.

NOTE: The SINGLE FAUXCHET® EDGING here is stitched using a piece of double slip stitched fauxchet® fabric.

Push the needle through the first stitch at the edge of fabric to be edged (going through both front and back loops) and hold yarn at left of needle eye.

Push the needle through the loop you are holding (forming a slip stitch) and securing the yarn to the edge.

Single Fauxchet Edging

Single Fauxchet® Edging

Single Fauxchet® Edging

Push the needle into the next stitch on the edge and grasp the two loops (the one you are holding and the one at the needle eye).

You Tube

LOOP STITCHING

This stitch is an elongated version of the slip stitch and can be stitched along the ridge of a fabric as top-stitching or around the edges as the perfect trim to any project.

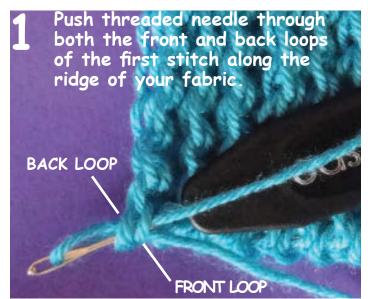

NOTE: The SAMPLE LOOP STITCH here is stitched along the edge of a piece of double slip stitched fabric which provides the perfect ridge for stitching on.

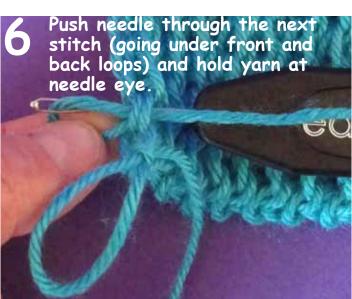

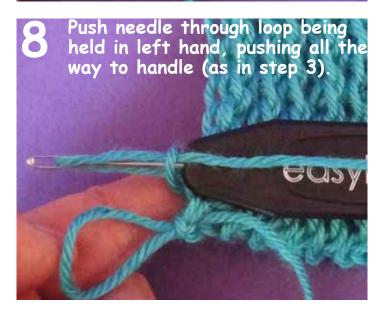

Loop Stitching

4 Grasp yarn at the left of needle eye.

Holding the loop with left hand, pull needle back away from the loop, tightening the knot and forming the first loop stitch.

Holding loop at needle eye, pull needle back 1 inch (as in step 2).

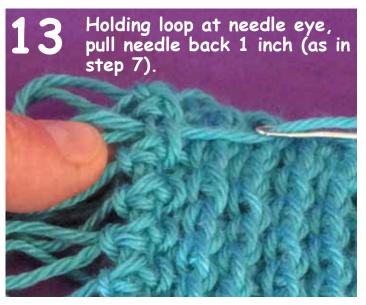

Loop Stitching

Holding the loop with left hand, pull needle back away from loop, tightening the knot and forming the second loop stitch.

Push needle under next stitch goes here (under one loop from the new row and 1 loop from previous row).

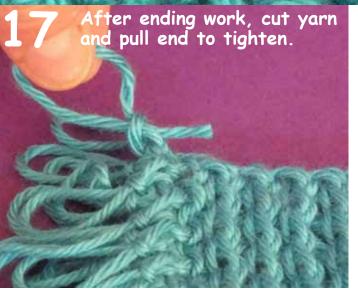

Loop Stitching

Increasing and Decreasing

INCREASING and DECREASING means to LENGTHEN or SHORTEN a row of stitches. There are 2 ways of doing this, AT THE END OF A ROW and WITHIN A ROW.

INCREASING and DECREASING AT THE END OF A ROW

To increase or decrease at the end of the row requires adding or eliminating stitches before making the turning stitch.

(When decreasing 1 stitch at the end of the row, this means to not make the turning stitch before turning the work.)

INCREASING and DECREASING WITHIN A ROW

The pattern will indicate where in the row to add or eliminate the stitch(es).

TO ADD STITCHES WITHIN A ROW

Push needle first through the back loop of your stitch and then through the front loop of the same stitch of previous row (forming two new stitches for each stitch).

TO ELIMINATE STITCHES WITHIN A ROW

Push needle through every other stitch of previous row (eliminating one stitch for each two stitches).
